

## Assignment 2

Problem 1)  $R(A, B, C, D, E)$

①  $A \rightarrow B$     ②  $E \rightarrow A$     ③  $CE \rightarrow D$

1.1 • Can only produce: A, B, and D but not C and E therefore C and E has to be in every key.

Key:  $\{CE\} \xrightarrow{③} \{CDE\} \xrightarrow{②} \{ACDE\} \xrightarrow{①} \{ABCDE\}$

Form the key and superkey.

$\{CE\}$

$\{CEA\}$  also a key

$\{C\} \xrightarrow{③} \{CE\}$ ,  $\{E\} \xrightarrow{②} \{EA\}$

Minimal Key: • Since all other keys requires  $\{CE\}$  in it plus some other variable, making it bigger than  $\{CE\}$ .  
Thus,  $\{CE\}$  is a minimal key by default.

1.2  $\{A\} \rightarrow \{A\} + \checkmark$

- check redundancy,

$\checkmark$  = no other rules can be applied.

Minimal Basis:  $\{E\} \rightarrow \{E\} + \checkmark$

$\{CE\} \xrightarrow{③} \{CEA\} \checkmark$

1.3  $R(A, B, C, D, E)$

BCNF:  $\{A\} \xrightarrow{①} \{AB\}$  - Does not fit BCNF.

$R_1 \{AB\}$      $R_{12} \{ACDE\}$

- Split base and check rule.

$\downarrow$  already in BCNF     $\downarrow$  LHS not a super key due to FD2 ( $E \rightarrow A$ )

$R_{21} \{AE\}$

$R_{22} \{CDE\}$

$\downarrow$  already in BCNF

∴  $R_1 \{AB\}$   
 $R_{21} \{AE\}$   
 $R_{22} \{CDE\}$

1.4

$$R(A, B, C, D, E)$$

3NF:

$R, \{AB\}$

$$R_2 \in A$$

$R_3 \{C, E, D\}$

net Super day

contain key  $\therefore$  superkey  $\checkmark$

2

$$R_3 \{CED\}$$

Problem 7)  $S(C, E, J, P, R, T)$

①  $J \rightarrow P$  ②  $T \rightarrow E$  ③  $J \rightarrow C$  ④  $JT \rightarrow R$  ⑤  $C \rightarrow P$

Q.1 Can only produce: C, E, P, and R but not J and T therefore J and T has to be in every key.

Key:  $\{JT\} \xrightarrow{①} \{JTP\} \xrightarrow{②} \{JTPE\} \xrightarrow{③} \{JTPEC\} \xrightarrow{④} \{JTPECR\}$   
 ⑤ is redundant

Form the key and superkey.

$\{JT\}$  —————  $\therefore \{JTPCE\}$  also a key  
 $\{JT\} \xrightarrow{①} \{JTP\} \xrightarrow{③} \{JTPC\}$   $\{JT\} \xrightarrow{②} \{JTPE\}$

Minimal key: Since all other keys requires  $\{JT\}$  in its plus some other variable, making it bigger than  $\{JT\}$ . Thus,  $\{JT\}$  is a minimal key by default.

1.2  $\{J\} \xrightarrow{③} \{JC\} \xrightarrow{⑤} \{JCP\}$  — check redundancy  
 $\{T\} \rightarrow \{T\}$  ✓  $\{J\}$   $\{CP\}$  redundant on ⑤  
 $\{J\} \xrightarrow{①} \{JP\}$  ✓  
 $\{JT\} \xrightarrow{①} \{JTP\} \xrightarrow{③} \{JTPC\} \xrightarrow{②} \{JTPCE\}$  ✓  
 $\{C\} \rightarrow \{C\}$  ✓

Minimal basis:

$\{T\} \rightarrow \{T\}$
$\{J\} \rightarrow \{JP\}$
$\{JT\} \rightarrow \{JTPCE\}$
$\{C\} \rightarrow \{C\}$

1.3 S(C, E, J, P, R, T)

BCNF:  $\{T\} \xrightarrow{\textcircled{1}} \{TE\}$  - Does not fit BCNF

$R_1 \{TE\}$   $R_2 \{T, C, S, P, R\}$  - Split base and check rule.  
 already in BCNF / LHS not a super key due to FD  $\{C \rightarrow P\}$   
 $\uparrow$   $R_1 \{CP\}$   $R_2 \{CTSR\}$  FD  $\{J \rightarrow C\}$   
 $R_3 \{JC\}$   $R_4 \{J, R, T\}$   
 already in BCNF

$\therefore$   $R_1 \{TE\}$   
 $R_2 \{CP\}$   
 $R_3 \{JC\}$   
 $R_4 \{J, R, T\}$

1.4 S(C, E, J, P, R, T)

3NF:  $R_1 \{JP\}$   $R_2 \{TE\}$   $R_3 \{JC\}$   $R_4 \{J, R, T\}$   $R_5 \{CP\}$   
 $\downarrow$   $\downarrow$   $\downarrow$   $\downarrow$   $\downarrow$   
 not superkey  $\leftarrow$  contains superkey

$\therefore$   $R_4 \{J, R, T\}$
